SUMMARY

Master's student in **Artificial Intelligence Systems** with professional experience at **Capgemini** and hands-on experience in **Machine Learning, Deep Learning, Computer Vision, NLP, and Data Science** through academic and personal projects. Seeking an **AI/ML, Data Science, or related internship or entry-level opportunity in France**.

EDUCATION

Master's in Artificial Intelligence Systems, EPITA School of Engineering 02/2026 – Present | Paris, France
Score : 16.64/20

Bachelor's of Technology (Electronics and communication Engineering) 07/2019 – 07/2023 | Punjab, India
Chandigarh Engineering College
Average CGPA : 8.81/10

PROFESSIONAL EXPERIENCE

Capgemini, Software developer 10/2024 – 05/2026 | Pune, India

- Analyzed and migrated legacy code from a multi-market to single-market architecture
- Developed enterprise applications using **C#, ASP.NET Core, C++, JavaScript, and SQL Server**
- Developed and resolved software defects across **Reports and Receipts** modules
- Tested migrated applications to ensure **accuracy, stability, and reliability**
- Collaborated with cross-functional teams in an **Agile software development environment**

Eon Infotech limited, Embedded systems intern 07/2021 – 09/2021 | Mohali, India

- Developed a **GPS-based vehicle tracking system** for Chandigarh University
- Integrated **GPS modules with microcontrollers** for real-time vehicle tracking
- Performed **system testing and debugging** to improve tracking reliability and accuracy

PROJECTS

AI Meeting Assistant — Automated Meeting Transcription & Summarization 🔗

- Developed an **AI-powered meeting assistant** using Python with an end-to-end audio processing and **speech-to-text transcription** pipeline.
- Applied **NLP and LLM techniques** to analyze transcripts, generate summaries, and extract key meeting information.
- Automated extraction of **discussion points, decisions, action items, and highlights** into structured meeting summaries.

EmojiMirror — Real-Time Facial Expression & Emoji Face Swap 🔗

- Developed a **real-time computer vision application** using Python, OpenCV, and dlib for face detection and facial landmark tracking.
- Implemented **facial feature mapping, image processing, and geometric transformations** to accurately align and transform emoji overlays.
- Integrated **machine learning-based facial expression analysis** and optimized webcam processing for responsive real-time inference.

Bike Sharing Demand Prediction & Data Pipeline, Python · Machine Learning · Apache Airflow · Docker · Streamlit

- Built a **machine learning pipeline** for bike-sharing demand prediction, including data preprocessing, feature engineering, and model evaluation.
- Developed automated **ETL workflows using Apache Airflow** and containerized the pipeline with Docker for reproducible execution.
- Built a **Streamlit dashboard** for model predictions, data visualization, and bike-demand analysis.

SKILLS

Programming: Python, SQL, C#, C++, JavaScript

Machine Learning: Scikit-learn, Supervised Learning, Unsupervised Learning, Feature Engineering, Model Evaluation

AI & Deep Learning: Deep Learning, NLP, LLMs, Computer Vision, CNN

Data & Engineering: Pandas, NumPy, Data Preprocessing, Data Visualization, Apache Airflow, ETL

Tools & Deployment: Docker, Streamlit, Git, GitHub

Cloud: Microsoft Azure

TRAINING

ThinkNEXT Technologies Pvt. Ltd. — IoT and Python with AI & Machine Learning Feb 2023 – Jul 2023

CERTIFICATES

Microsoft, Azure AI Fundamentals
June 2025

Microsoft, Azure Fundamentals
April 2025

Microsoft, Azure Developer Associate
June 2025

EXTRA CURRICULAR ACTIVITIES

- 1st Place** – ICCS Technical Poster Competition (2021) and KVS Regional Science Exhibition (2017), represented at National Level; participated in Navadhara 2022 and AICTE Chhatra Vishwakarma Award 2021.
- National-Level Taekwondo Participant** (2015–2016) with Regional Gold Medal and multiple medals; **Scout & Guide Member** (2014–2017), participating in community service and adventure camps.
